ACADEMIC CREDIT FOR JUNIOR ACADEMY COURSES IN MUSIC

School Year: _____

A semester credit represents 22.5 minutes of class work per week multiplied by 36 weeks. Ten semester credits would be the equivalent of a 45 minute class meeting five times a week for the entire school year. Proportional credit is given for approved classes taught by denominationally certified teachers.

Your school register will indicate semester grades for students taking music but it will not tell the number of minutes for those classes nor how often or for how many weeks those classes met.

Please provide the following information for band class, choral class, instrument lessons or piano lessons *only for which you believe credit should be given*. We will compute and add the normal practice time. From this combined information semester credits will be computed.
